Dear TD Recruiting Team,

Currently I am a second year student attending Ontario Tech University for a Bachelor's in Computer Science, with a cumulative GPA of 3.7. I have been passionate about programming since 2019 in my Grade 10 year of high school. I wanted to apply to TD since I want to share my devotion to software development with a team. Not to mention how exciting it would be to create applications for computers using TD's Innovation Framework, in combination with my personal and educational coding experience.

More than programming, I am also an artist. I have an immensely large portfolio of self-composed music and pixel art. These hobbies align perfectly with my path in life, for I often use my created assets in HTML website projects that I work on. Additionally, I am a Second-Degree Black Belt in Kempo Karate. I received my degree from the Stouffville Martial Arts Academy. Furthermore, I was awarded Honour Roll for all years of high school, with a consistent average of 90% or higher. I also received the Grade 10 Computer Science Award, due to my high grades and involvement in my high school's Computer Science course. Currently at Ontario Tech University, I have achieved the prestigious president's list award for both terms of my first year.

I am determined to keep moving forward with my knowledge of software development, and look forward to leaving my mark on the software engineering industry with TD.

Thank you for your time,
Jeremy Thummel
